MUSIC AS ASSET FOR GOOD OF COMMUNITY

Fort Worth, Texas, Dec. 29.—Recognizing the universal and practical value of music, Mrs. John F. Lyons, president of the National Federation of Music Clubs, in a letter to the individual clubs of the federation, sets forth the aims of that organization for the coming year. Eleven hundred clubs, with approximately 200,000 members are affiliated with the national organization. Mrs. Lyons said:

"I want to see the music clubs function properly as the greatest and most powerful community asset for the good of the community and for the advancement of the community life in all its phases," said Mrs. Lyons, in her first direct communication to the clubs over which she took charge this year. "We have long left behind us the idea that music was only for the favored and cultured few and have come to recognize its universal and practical value. We must make good as a community asset for the good of the community and for the advancement of the community life in all its phases," said Mrs. Lyons. In her first direct communication to the clubs over which she took charge this year, "We have long left behind us the idea that music was only for the favored and cultured few and have come to recognize its universal and practical value. We must make good as a community asset for the good of the community and for the advancement of the community life in all its phases," said Mrs. Lyons. In her first direct communication to the clubs over which she took charge this year, "We have long left behind us the idea that music was only for the favored and cultured few and have come to recognize its universal and practical value. We must make good as a community asset for the good of the community and for the advancement of the community life in all its phases," said Mrs. Lyons.

"As a national organization, I feel that our strongest efforts must be centered for a time along lines of extension, education and greater efficiency, for the national, state, and individual organizations. We must have more clubs, stronger clubs, greater unification of plans and a general coordinating and strengthening of federation machinery before our organization can command the leadership that is rightfully its own and establish proper place in the history of musical America." Mrs. Cecil Frankel, Los Angeles, Calif., is chairman of extension and will plan and carry on the work through the district and state presidents, according to Mrs. Lyons.

Attention to the cause of music in the public school was urged by Mrs. Lyons as first among her policies.

Mrs. Frances Elliott Clark, of Camden, New Jersey, is chairman of the education department. Mrs. William John Hall, St. Louis, Mo., is chairman of Junior and Senior Music, and Mrs. Mary E. Smith, of the department of Extension, is in the hands of Mrs. Ella May Smith, Columbus, Ohio.

Three matters of legislation were called to the attention of the individual clubs by the national president. Mrs. Lyons urged a protest against the proposed tax on musical instruments and support of the Towner-Mohr bill for a department of education and establishment of a national conservatory of music.

DUTIES ON CRUDE OIL

FEATURE TARIFF HEARING

Washington, Dec. 29.—Varying duties on crude oil were proposed before the Senate Finance committee today by spokesmen for mid-continent producers and all duties were proposed by American producers operating in Mexico and representatives of various classes of oil consumers in this country.

Renewing the fight for a tariff levy which was lost in the house by an overwhelming vote, Senator Harrell, republican, Oklahoma, said he was satisfied with the original rates proposed by the ways and means committee, 35 cents a barrel on crude and 55 cents a barrel on fuel. Senator Curtis of Kansas, a republican member of the finance committee, has introduced an amendment to the tariff bill proposing these duties:

A duty of \$1 a barrel was urged by Harry H. Smith of Tulsa, Okla., secretary of the Mid-Continent Oil and Gas Association, who said this would equalize the difference in the costs of production in Mexico and in the mid-continent fields. W. H. Gray, of Tulsa, representing the National Association of Independent Oil Producers, suggested no specific rates, but urged that the president be empowered to assess a duty equivalent to the combined import and export levies imposed by Mexico, Colombia, and Venezuela, from which the chief American imports come.

Spokesmen for the domestic producers said, and some members of the committee agreed, that the mid-continent industry was in bad condition at this time. Mr. Smith said that 200,000 small wells could not continue in operation at present prices and that a tariff ought to be enacted both as a protection and a conservative measure.

Opponents of a duty on oil said tariff protection was not necessary and would serve only to increase the price to all consumers. They laid particular stress upon what they said would be the effect on the farmers, the merchant marine, the navy, the consumers of manufactured goods, and industries using oil for fuel and as raw material for automobiles, trucks and tractors.

It also was argued by the opponents that higher priced oil would increase the cost of and retard road building and that since the government aided in constructing the roads it would have to pay part of the duty. This also was true, they said, with respect to oil used by the navy.

MEETING OF MANUFACTURERS' ASSOCIATION OF CONNECTICUT

New Haven, Dec. 29.—Discussions of economic and industrial conditions were held at the annual meeting of the Manufacturers' Association of Connecticut here today. E. Kent Hubbard of Middletown was re-elected president of the association. The speakers at the afternoon session were Walter Camp, president of the New Haven Club; Carl W. Ackerman, former newspaper correspondent in Europe; and Congressman John Q. Tilson of Connecticut.

In addition to Mr. Hubbard the following officers were elected: Vice president, John H. Goss, Waterbury; treasurer, Robert C. Buell, Hartford; directors, William Park, Stafford Springs; Don H. Curtis, Willimantic; W. W. Wilcox, Middletown; E. A. Moore, New Britain; I. M. Ullman, New Haven; Charles T. Treadway, Bristol; F. J. Kingsbury, Bridgeport; Oliver L. Johnson, Jewett City.

WARRANTS TO BE ISSUED FOR RIATTO THEATRE FIRE

New Haven, Dec. 29.—Warrants for the arrest of Building Inspector Joseph E. Austin, Alfred S. Black, president of the Connecticut Theatre Corporation, and Lawrence E. Carroll, manager of the Riatio theatre, will be issued this week based upon the finding of Coroner Hill Mix in the Riatio theatre fire, City Attorney Sheridan Whitaker announced today. He said that the warrants would charge manslaughter. Nine persons lost their lives in this fire which occurred on the evening of November 27.

A far different situation developed when the second Riatio resolution, proposing that submarines be prohibited from attacking commerce in any circumstances, was brought up late in the day. Such a proposition would involve a change from the present understanding of international law, and there was a lively discussion over how such a change could be made so that it would be accepted by all nations. Mr. Balfour suggested an amendment to make the prohibition immediately effective, as between the five powers, and Mr. Root acceded to the proposal. The meeting then adjourned without having heard the views of the other powers.

It was said tonight that the French, Italians and Japanese all would be unprepared to accede finally to the second resolution until they had further communication with their governments, but there was agreement a tendency among the Italians to favor, and the French to oppose the plan. The second of the French delegates seemed to favor the suggestion as a renewal in another form, of the British request for abolition of underwater craft altogether.

In some quarters it was suggested that the French might accede to the plan, however, on condition that the conference take a positive stand for freedom of the seas, a proposal which did not seem likely to find favor among other delegations. Among the Italians there appeared to be a disposition to believe that acceptance of the proposal might be to Italy's benefit, because of the large amount of supplies which she must bring over easily-severed trade routes in the Mediterranean.

For the British, it was declared tonight that even if the amended Riatio proposition was adopted, and submarines prohibited from attacking merchant ships, Great Britain would continue to organize her trawlers against possible submarine onslaughts. The British, it was stated by one of their spokesmen, would not regard such a prohibition as tantamount to abolition of the submarine, because they would feel that in time of great stress they might disregard the rules as Germany did in the world war.

The aircraft sub-committee, which practically completed its report today, and may present it to the delegates tomorrow, was said tonight to regard the question of regulating air warfare as quite as troublesome as the problem of drafting submarine restrictions. The report is said to recommend, however, that some step in that direction be taken by the Washington conference.
